

Pair & Connect

More than half of the customers will encounter problems in Bluetooth pairing and connecting, therefore, we strongly suggest that you should read this part before going to pair and connect your device. This part can help you to quickly solve the pairing and connecting problems. Also welcome to visit our website to obtain relevant information at any time.

Part I: First time to pair & connect

1. This Part I is only used for the first time to pair and connect this gamepad with your phone.
2. If you can find "BBC-GAME" in the "Paired devices" list of your phone, which means you have ever paired this gamepad with your phone, you should go to Part II for a rapid connection.

Step 1: Put the G-M-I switch key on G mode

Step 2: Put your gamepad in "Pairing Mode"

Pairing Mode: LED 1 blinks 4 times per second

Long press the Home button for 6 seconds, the indicator LED 1 will turn from blink twice per second to four times per second. The gamepad now is about to be paired with your phone.

Step 3: Turn on Bluetooth

Go into Settings and tap the Bluetooth option then flip the switch to the "ON" position. Then you will find the "BBC-GAME" in the "Available devices" list. You should wait a few seconds until the Bluetooth finishes scanning.

Step 4: Tap "BBC-GAME" to pair and connect

If paired successfully, the LED 1 will be solid bright light and the device will be moved to "Paired devices" list and marked as "Connected".

Waiting to pair & connect

Paired and Connected

Part II: Rapidly connect, if paired before

If you have paired this gamepad with your phone before, and you find "BBC-GAME" is in your phone's "Paired devices" list, follow these steps to make a rapid connection.

Step 1: Turn on Bluetooth

Go into Settings and tap the Bluetooth option then flip the switch to the "ON" position. Then you will find the "BBC-GAME" in the available devices.

(If you don't find "BBC-GAME" in the "Paired devices" list which means they haven't been paired, press the home button for 2 seconds to power off, and go to Part I.)

Step 2: Power on the gamepad

Press the Home button for 3 seconds (Power ON Status: LED 1 blinks 2 times per second), the gamepad will be automatically connected to your phone. "BBC-GAME" will be marked as "Connected"

Part III: Unpair & Reconnect

If you still fail to make the gamepad pair & connect to your device after following Part I and Part II, here we provide a final solution.

Step 1: Unpair/Forget the gamepad

from the "Paired Devices" list.

Step 2: Power off the gamepad

Press the Home button for 3 seconds until all LED lights turn off.

Step 3: Follow Part I to pair and connect

Wired Connection

1. If you connect the gamepad to computer via USB charging cable, it will work as wired gamepad for the computer. No driver, just plug and play.

Note: when you play game on your phone, please don't charge the gamepad via computer.

2. You can connect the gamepad to smartphone via OTG cable

Q: Why LED 1 blinks, but the gamepad is unable to connect to my phone?

A: If the LED 1 blinks, and you can't find the BBC-Game under the "Available devices" listing, which means that the gamepad didn't enter the "Pairing Mode". Please press Home button for 3 seconds to power off the gamepad, and then back to the Part I.

If the LED 1 blinks, and you find the BBC-Game under the "Paired Devices" listing, please press Home button for 3 seconds to power off the gamepad and then press Home button for 3 seconds to power on gamepad which it will automatically connect to your phone.

Q: Why the Bluetooth disconnect when I charge gamepad via computer by usb charging cable?

A: It will work as a wired gamepad for computer if you connect it to computer via the usb charging cable.

Indicator LED

LED Signal	Gamepad Status
LED lights are all powered off	Powered off
LED 1 slow flashes (2-flash/second)	Powered on but no paired
LED 1 quick flashes(4-flash/second)	Pairing Mode (Waiting for pairing and connecting)
LED 1 constant red light	Connected
LED 4 slow flashes	Low power
LED 1	Gamepad Mode
LED 2	Mouse Mode
LED 3	ICADE Mode
LED 4	Power Status

Working Modes

This Controller has three working modes.

G: works as a **gamepad** to control the games for Android

M: works as a **mouse** to move the cursor for Android

I: ICADE for iPhone and iPad

You can switch working mode with the G-M-I switch.

Make sure put the G-M-I switch on the G mode before connecting to Android device. When connected, it can be switched between G mode and M mode. But if you pair it to Android device under I mode, it won't work when you switch the G-M-I switch to G mode directly. In this case, you must turn off the controller then put G-M-I switch to G mode to pair and connect Android device.
